About Dongze

Nice to meet You.

Dongze was founded in 2014 and ever since that time healthy growth figures were realized on a yearly basis .

Quality of tools comes first, without a doubt! .

Dongze is proud to have various items in the sales program that are a result from intense communications with end users and product development meetings with customers. One of the most important incentives for customers to choose for Dongze and to stay with Dongze, is the high service level which is being demonstrated and proven again and again. Typical of Dongze is the vast assortment of tools for the metal , masonry and woodworking industry as well as the construction industry. A wide selection of high-end tools is available for each industry.

The assortment is not only up to date and fine-tuned to the demands of the market, but actually on stock and available!

There' s much more to tell about Dongze, the products and the added value of the concept that Dongze offers.
